## **DETAILED ACTION**

### ***Reasons For Allowance***

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the claimed combination including the limitations directed to the specifics of a valve timing control device comprising a first cylindrical part is provided on a rotating member, a second cylindrical member is provided around the first cylindrical part and the second cylindrical part is overlaid on the other on an inner side in a radial direction, a sealing groove for accommodating a sealing member for sealing between the first cylindrical part and the second cylindrical member, and a friction between the side surface of the sealing member and the sealing groove is set to be greater than a friction between an outer peripheral surface of the sealing member and an inner peripheral surface of the first cylindrical part, is not disclosed or rendered obvious the art of record.

Regarding claim 5, the claimed combination including the limitations directed to the specifics of a valve timing control device comprising a first cylindrical part is provided on a rotating member, a second cylindrical member is provided around the first cylindrical part and the second cylindrical part is overlaid on the other on an inner side in a radial direction, a sealing groove for accommodating a sealing member for sealing between the first cylindrical part and the second cylindrical member, and a friction between the side surface of the sealing member and the sealing groove is set to be smaller than a friction between an outer peripheral surface of the sealing member and an inner
